

Name: Razmik Sargsyan

Position: Publications and Promotion Officer 2016-2017

Dear Colleagues,

At first I got involved in YEE actions by participating in TC „Be(e) the Change“ and being a representative of „Young Biologists Association“ NGO at the Annual Meeting. I had no ambitions to apply for a Board Position, but then when I saw the work in YEE and the great effort with which everyone works here, and how much everyone is trying to make the world better, I thought that the chance of being part of this organization is a great chance for me. Although, I did not dare to apply for a position, but my opinion changed when my name appeared in the nominee list.

This year was very challenging for me, as it was my first year in Youth and Environment Europe Board as Promo and Publications officer. At first because of being unexperienced I was feeling confused, but the skype meetings and the introduction helped me to overcome the first challenge. The year was quite complicated also, because it was hard to keep balance between studying, working in laboratory and working in YEE. The hardest part was being in touch and respond to messages, because of very complicated schedule.

Coming back to myself, I am not so satisfied by my work and productivity. Most of the time I was busy preparing for exams and doing my routine work in the university, so I could not involve in YEE work fully, but I was trying to do my best and try to overcome that problems.

I am very thankful to the Board and Office for the help and such great opportunity, and looking forward the AM and TC “International Environmental Action Days”.

Regards,
Raz
