

## Youth and Environment Europe (YEE)

Youth and Environment Europe (YEE) is a platform of many European youth organisations that study nature or are active in environmental protection. These member organisations come together from 28 countries. The aim of YEE is to encourage youth to be involved in environmental protection and to provide a platform where these organisations can work together.

All activities are organised and carried out by young people under 30. YEE organises and encourages all activities that can increase the knowledge, understanding and appreciation of nature and the awareness of environmental problems among young people in Europe. Its aim is to promote the commitment of youth to the principles of environmental conservation. Therefore, young people's voluntary actions have to be stimulated for the protection and the rational use of the Earth's resources. Since environmental problems do not accept any borders, members act together within YEE in order to implement ideas in local groups and in joint activities. Within international actions, YEE intend to raise public awareness and to put pressure on enterprises and politicians.

Further information can be found at [www.yeenet.eu](http://www.yeenet.eu)

## Karlsruhochschule International University

As state-accredited university sponsored by a non-profit making foundation, Karlsruhochschule pursues a practical, market-oriented and – above all – international philosophy across all of its programmes and has built up strong partnerships with companies. Accordingly the eight Bachelor's programmes are forward-looking and international:

- Compact programmes, with a duration of only six semesters, and intensive mentoring facilitate a successful career start; on average, Karlsruhochschule graduates find jobs some six to twelve months earlier than graduates of similar programmes from other institutions
- From the third semester onwards, the medium of instruction is predominantly English. Students wishing to study entirely in English can attend the International Business Programme in the first two semesters and transfer to the Energy Management Programme for the second and third academic years
- All students study a second, and optionally third, foreign language. We offer courses in the English, French, Italian, Spanish, Arabic, Russian and Chinese languages
- With a large number of partner universities across the world, our students can complete an attractive semester abroad without extending the duration of their studies
- State accredited by the Baden-Württemberg Ministry of Science, Research and the Arts; programmes recognised and accredited by the FIBAA (Foundation for International Business Administration Accreditation)
- CHE ranking 2011: a leading position among German universities of applied sciences offering business administration programmes as well as in the overall ranking of all German universities of applied sciences

**Karlsruhochschule**  
International University

**YEE**  
YOUTH AND  
ENVIRONMENT  
EUROPE

Can you picture yourself here?  
Innovation manager for  
renewable energies.

Study the **International Energy Management** Bachelor's Programme at **Karlsruhochschule International University** with a **YEE scholarship**.

## The Programme

Currently one of the most dynamic and important socio-political economic sectors, the international energy industry needs future leaders who are able to assume social responsibility and are forward-looking. For this reason, the „**International Energy Management**“ Programme boaches the issue of sustainability of natural resources and energy and places economic issues within the context of international collaboration. In six practice-oriented semesters you will get to know the communication between producers, intermediaries and clients from a systemic point of view. You will learn how to analyse and reflect interrelations from a cross-societal and international perspective.

Whether as consultant for climate and environmental protection, expert on international energy markets, manager of sustainable energy products, employee of a climate agency or a non-profit organisation, manager of an international or national energy company, a municipal utility company or energy provider, as energy trader at the electricity stock exchange or project manager in the mineral oil or wind turbine industry – the „**International Energy Management**“ Programme will open doors for you on both national and international job markets.

## The Scholarship

In cooperation with Karlsruhochschule, **YEE** is offering a scholarship for the **International Energy Management** Programme in the 2012/13 winter semester. The scholarship covers the tuition fees for the 3-year Bachelor's programme at Karlsruhochschule.

In order to apply for the scholarship, please submit the regular application for admission to Karlsruhochschule, including the documents specified on the application form. Please refer your motivational letter to the YEE scholarship. You are required to demonstrate your motivation for applying for the scholarship by a free to choose format (for example an article, a video, a poster, a collage) on the topic of “My future in the energy industry”.

Please send your application to:

**Karlsruhochschule International University**  
**Student Admissions Service**  
**Karlstraße 36-38**  
**76133 Karlsruhe**

**Deadline for applications is 15 July 2012.**

If your application meets our requirements, you will be invited to a selection workshop at Karlsruhochschule and will have the chance to show us why you are the best candidate for the scholarship!

Further information about studying at Karlsruhochschule and the selection procedure can be found at **[www.karlsruhochschule.de](http://www.karlsruhochschule.de)** or contact Jessica Bast at **[jbast@karlsruhochschule.de](mailto:jbast@karlsruhochschule.de)** or by telephone at **+49 721 1303-3040**.
